It is obvious that most folks in America do not know or realize that the system of free enterprise that makes a percentage of citizens makes this the richest country in the world. Name me a place you would rather live...be serious.

No new coal plants means no new digging for coal means no new jobs in coal mining and supportive industries.

money for new coal plants on other energy sources means new jobs and cleaner energy.

"Clean coal is an option, the cap and trade will grow the coal industry and kill business that insist on killing us."

Give the government enough power and they'll tell you what you can eat.. oh wait they're already trying to do that

People do realize that if Obama does anything unconstitutional we have a Supreme Court that will check him, right?

And furthermore that 2 years into his administration 1/3 of the senate and 3/3 of the house will be up for election?

I just laugh so hard at these dire predictions because a president simply is not that powerful.

Congress would never let coal industry go bankrupt. No republican wouldn't this and the Dems from coal states wouldn't either.

So just relax.

Clean coal is an option, the cap and trade will grow the coal industry and kill business that insist on killing us. Its like when we stopped using diesel fuel in passenger vehicles...

Obama smeared himself? Is this a Barack Obama impersonator?
