Subject: RE: WETLANDS CLASS-CAPR San Juan Oct. 30 & 31

Hi Jack,

We will video tape the meeting. We tape all of our presentations. We will be happy to offer it to others for any size donation they want to make to the cause.

Take care,
Frank

Subject: WETLANDS CLASS-CAPR San Juan Oct. 30 & 31
Importance: High

10/31/2010

Sponsored by
CAPR San Juan

**Critical Areas Seminar
Wetlands, Science & Laws**

This class is designed for:
 ★ Builders ★ Developers ★ Architects ★ Law Professionals
 ★ Planners ★ Landscapers ★ Property Owners
 ★ ALL Interested Citizens

Registration \$15 per day or \$25 for both days
(includes lunch)

OCTOBER 30 & 31 @ SAN JUAN GRANGE

Steve Neugebauer is a licensed hydrogeologist/engineering geologist with over 25 years experience, and a Principal with SNR Company, a consulting firm based in Duvall. He started SNR to correct all of the "wrongs" not only in wetland areas but also by being objective and bringing in more precise science.

Justin Park's interest in the law came from his involvement in his family's business – electrical contracting. Justin represents clients on issues that face businesses and individuals such as: Construction, Real Estate and Government Relations/Land Use.

Paul Hirsch is an environmental attorney licensed in the State of Washington. He is also a geomorphologist with an abiding interest in land and water, and how these react to human use and development.

SEMINAR SCHEDULE

Saturday October 30, 2010

- 11:30 - 12:00 - Lunch at Grange Hall
- 12:00 - 4:10 - **What you need to know about legal issues of wetlands and other critical areas**

Sunday October 31, 2010

- 11:30 - 12:00 - Lunch at Grange Hall
- 12:00 - 4:10 - **The Science of Wetlands and Other Critical Areas**

Make checks payable to CAPR SAN Juan

Knowledge is power

To: Property Rights Groups/Individuals especially Washington, Evergreen Freedom Foundation, PLF, Groen-Stephens-Klinge, Mountain State Legal

This is a great idea and class if you can make it, also see flyer attached. We need directions also.

Since the property rights movement is scattered all over the state of Washington and this may benefit out of state folks as well, I would like to suggest the following.

Can someone(s) make a digital video/audio recording of this seminar to get this

10/31/2010

information in everyone's hands?

San Juan CAPR chapter could offer it for sale at a reasonable price to cover their costs plus a contribution to the chapter. If any of you folks going to this event have a camcorder, this would be the inexpensive way to go. Otherwise, if someone has connections with a business doing recording work, that may work.

The big printing outlets like Kinkos, Office Depot, etc. and I am told, some of the large chain drug stores have equipment to duplicate and label DVD's and CD's.

In addition, if the class is well received I would also like to suggest we bring these speakers to each of the CAPR chapters throughout the state.

As Frank says below "KNOWLEDGE IS POWER. All of Jefferson's worse fears, as well as all the anti-Federalists, have more than come true. It's time we take back this power.

We desperately need more "tools", i.e. weapons to fight back.

Hi John, Wayne & Dough,
Please add me to your email lists.
Thanks,
Frank

Knowledge is power. Come and join us on October 30th & 31st, 2010 for a seminar on wetland science and related laws. (Please look at the attached flyer).

Save yourself a lot of grief and money by being informed. This will also help in monitoring and encouraging the proper language in legislated regulations.

Did you know:

Because most wetland scientists do not understand wetland hydrology, what anaerobic means, or what reducing means and they do not understand the

10/31/2010

difference between normal forest organic soils and "histosols" (which are "hydric" organic soils), they often misclassify a site as a wetland that is actually an upland or in many cases a well tended garden that has had a lot of organic augmentation added to the soils.

In the long run, soils cannot form in high energy environments, and what you see are geologic deposits or as the soil scientists call them, parent materials the soils will form in when they get the chance.

First, you must have soils before you can have hydric soils, and most wetland scientists do not understand this.

The SMA and GMA definitions of wetlands include: "Wetlands do not include those artificial wetlands intentionally created from non wetland sites, including, but not limited to, irrigation and drainage ditches, grass-lined swales, canals, detention facilities, wastewater treatment facilities, farm ponds, and landscape amenities, or those wetlands created after July 1, 1990, that were unintentionally created as a result of the construction of a road, street, or highway."

Lots more to learn!

Sincerely,

Frank Penwell, President
