**Note: Click on Subject for hot link to this Word Document.**

## **Introduction**

Flathead County in Kalispell Montana is another example of what Mike Lindell and his Cyber Symposium Team was warning us about regarding Dominion/ES&S pushing new voting equipment to the counties.

- County Commissioners are holding public meetings announcing they are purchasing more voting equipment from the same manufactures that have been used to create the greatest election fraud in history in 2020.
- Fortunately local Patriot groups put out the word and rallied all to contact the County Commissioners and make a strong showing at the hearing to decide.
- The vote was 3 Flathead County Commissioners voted unanimous for Ballot on Demand while new laptops and tabulators were tabled.
- Congratulation to Tom Millett and Flathead Liberty Coalition - <https://flatheadliberty.com/> and to

## **Jack's Notes on the Mike Lindell Talk August 24 Tuesday AM PLUS August 25 5PM Wednesday**

- 1) County Clerks are being told how to deflect the public questions regarding Dominion and ES&S concerns versus addresses the truth.
- 2) Dominion is removing equipment erasing the 2020 election data.
- 3) No laws require cams on all the time.
- 4) Forensic experts plus lawyers are on this.
- 5) The counties must keep all data by law.
- 6) Reach out to your county clerks to get forensic images of all data on their machines before it is removed, via "updates", replacing with new equipment.
- 7) Contracts with Dominion are tying counties up to 2029 with threat of legal suit.
- 8) [www.nakedcounty.us](http://www.nakedcounty.us) shows a 3.5 hour video of Mesa County Colorado with 3 minutes to speak for each of the public who came in to oppose their proposal to order more the Dominion/ES&S voting equipment. There were some 90 people showed up

all opposing. Never-the-less all three county commissioners refused to listen and signed the contract to order more equipment.

- 9) Fake news is burying another smoking gun.
- 10) CORA = Colorado Open Request Act
- 11) Forensic image of Dominion machine before removal and after show removal of log files which record every transaction on the machine including who went into the machine.
- 12) Ask for a before and after image of the machines including the logs.
- 13) They are required to keep all records, e.g. tabulation records.
- 14) Backup by Secretary of State does not require log files.
- 15) When the equipment is wiped, all history is gone.
- 16) Go to this web site Mike Lindell set up to report election abuse in your municipality or state or fed - <https://crime.frankspeech.com/>.
  - a. Fill out the form.
  - b. Reach out to Mike confidentially.
  - c. Election fraud is nationwide in every single state.
  - d. Former Dominion employees are leaving and blowing the whistle and being intimidated for doing so.
- 17) All three Mesa County Colorado Commissioners signed the Dominion Contract.
- 18) Why is everybody protecting Dominion?
- 19) Add this online news to your bookmark as they carry Mike Lindell also - <https://www.oann.com/>
- 20) Counties need to follow the law.
- 21) Tina Peters the Mesa County CO Election Clerk is working from home as she does not feel safe going back to her office after the raid.

- 22) What is Dominion hiding?
- 23) Judges will not be afraid to take election cases once more county election fraud cases are taken on.
- 24) Support Lindell Legal Fund - <https://lindelllegalfund.org/>
  - a. This is not for Mike but for all the witnesses and guests.
  - b. For the cost of protection, security, legal.
- 25) Dominion laid off 40 employees and some are coming on Mike Lindell's show as whistle blowers.
- 26) Disproportionate number of people who did not live in state voted in that state, i.e. computer did that.
- 27) Names of people who DID NOT vote were used.
- 28) Obstructing the truth.
- 29) "There is no 2022 or 2024 election UNLESS we answer/solve the 2020 election fraud questions.
- 30) So many people in Georgia upset they will not let it die.
- 31) Media is the worst.
- 32) Georgia ruled machines are illegal.
- 33) Judges are living in fear too. They did not want to be the first to hear these cases.
- 34) This is just the start.
- 35) Agenda to break up and weaken our military by forcing all to take vaccination whether they want it or not. Officers are taking early outs, losing good people.
- 36) The Big Lie.
- 37) 50,000 Afghanistan evacuees being flown into the US with no vaccination plus a million recent illegal immigrants on the southern border.
- 38) Do not watch Fox news they have been taken by the left.

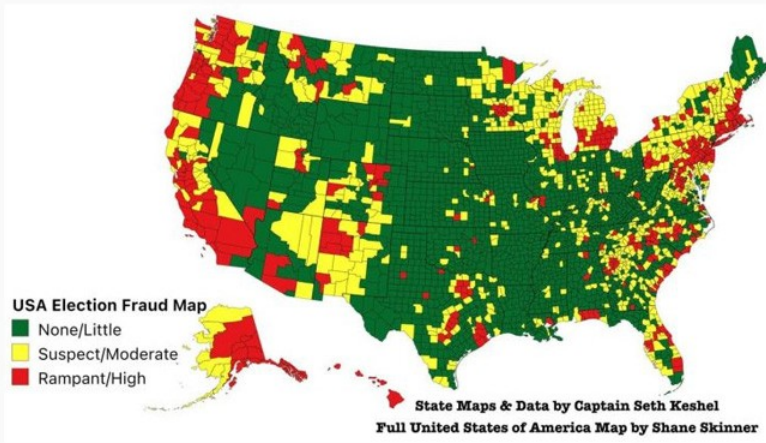

- 39) 40% of the Democrats believe the election was stolen.
- 40) Deep State is making regulations to stop home schooling.
- 41) Forcing vaccination not tested on animals first.
- 42) Covering up the cure of Hydroxyl Chloroquine.
- 43) Forensic experts are seeing "updates" include a complete replacement on hard drive.
- 44) "Trusted Build" updates took out all logs.
- 45) Counties are required by law to preserve election data for 22 years by Fed law.
- 46) Wisconsin WEC (Election Committee) voted 4 to 2 to allow Dominion to delete files with orders to preserve files.
- 47) Wiping out election data is an intrusion....anyone looking at Windows log.
- 48) SQL is a S/W data base language used in part to track election changes however SQL language studio allows db to be changed **without seeing who changed it.**
- 49) Forensic teams are laboring to verify everything very very carefully.
- 50) SQL allow software to be managed outside via a back door without being logged.
- 51) Demand all counties do a full forensic imaging of voting equipment.
- 52) Mike Lindell has the before and after cyber forensic images of Mesa County Colorado machines.
- 53) [Click on graphic below for full article on Mike Lindell site.](#)

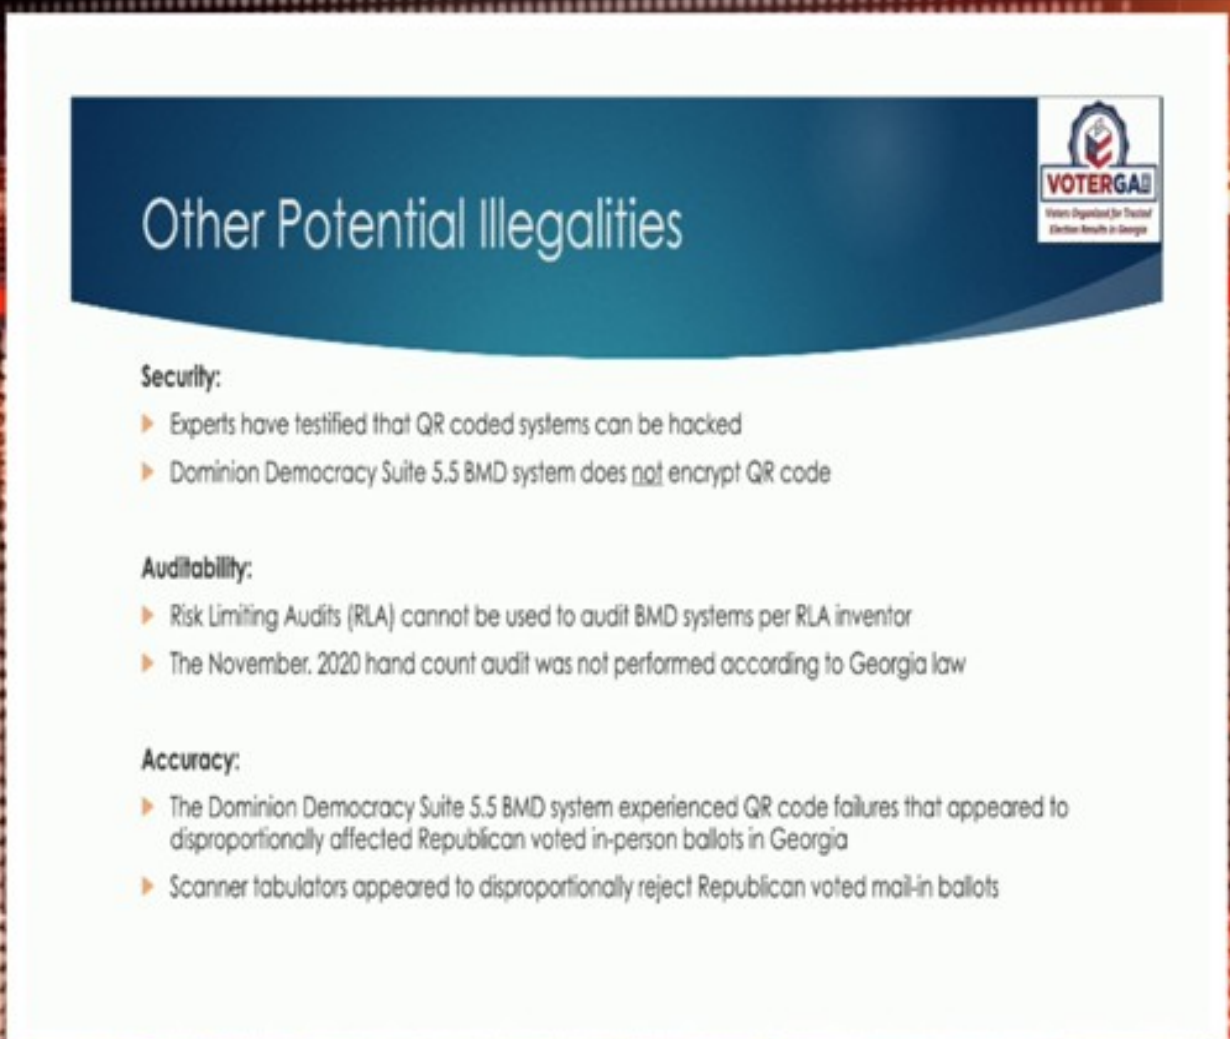

# Finds 8.1 Million Excess Votes in US Election, Affirms Trump Won PA, MI, WI, NV, AZ, GA and MN

By [Brannon Howse](#) 03 August, 2021

**The following are screen captures of his presentation 8-25- 2021 at 6PM CT.**

The screenshot shows a presentation slide with a dark blue header containing the title "Other Potential Illegalities" in white text. In the top right corner of the slide is the VOTERGA logo, which includes a circular emblem with a ballot and the text "VOTERGA" and " Voters Organized for Transparent Election Results in Georgia". Below the header, the slide is divided into three sections: "Security:", "Auditability:", and "Accuracy:", each followed by a bulleted list of points.

## Other Potential Illegalities

**Security:**

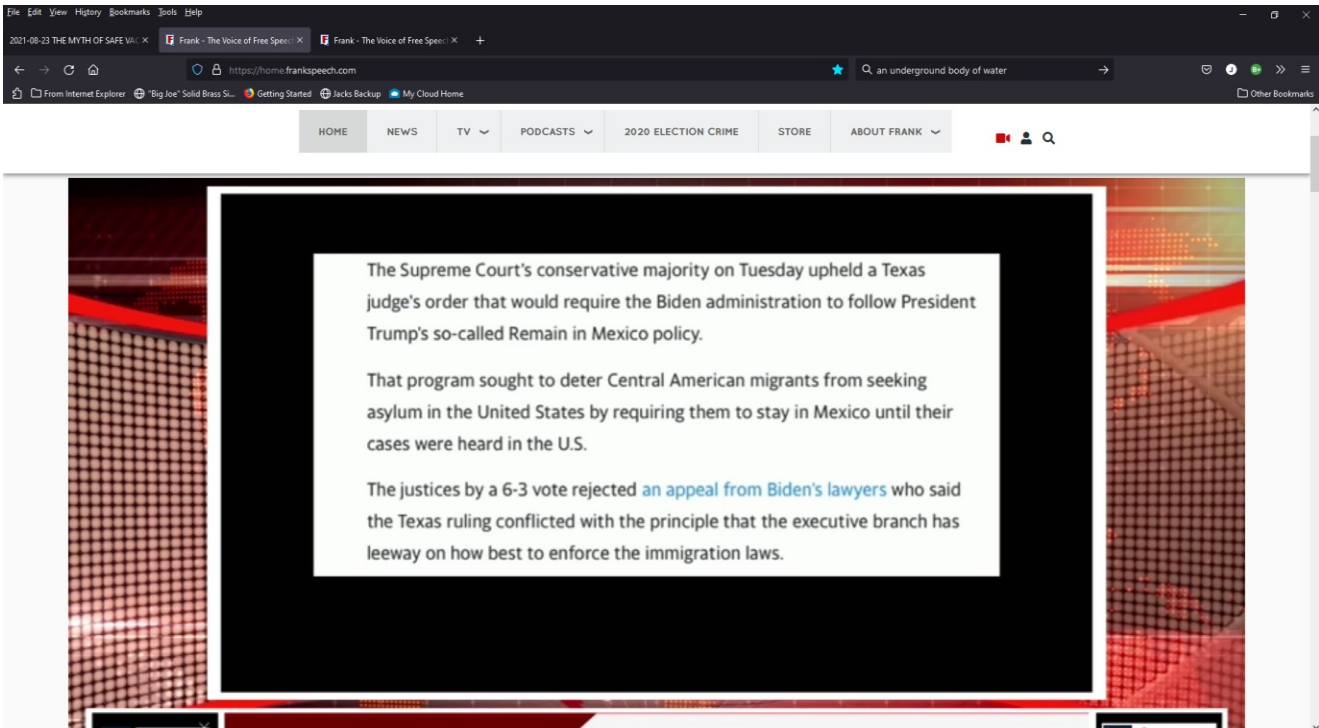

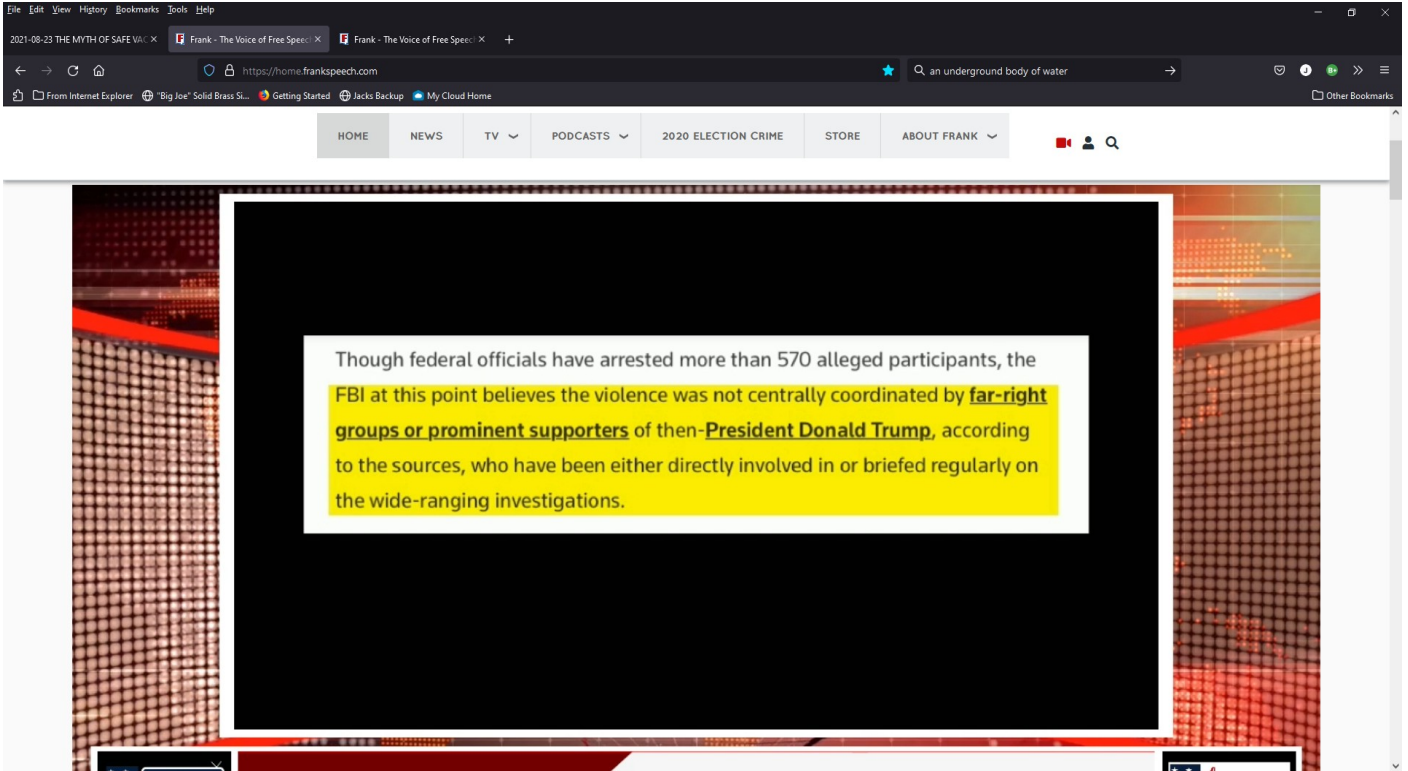

- ▶ Experts have testified that QR coded systems can be hacked
- ▶ Dominion Democracy Suite 5.5 BMD system does not encrypt QR code

**Auditability:**

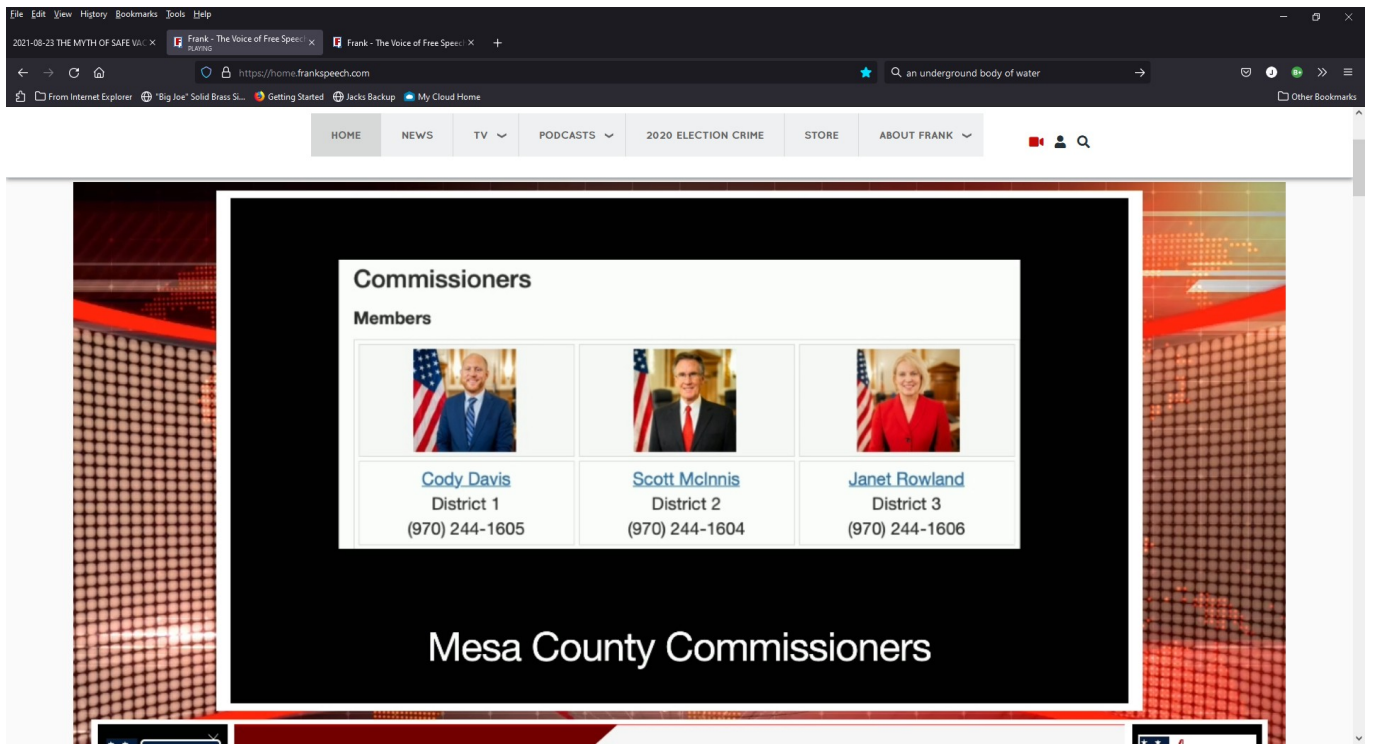

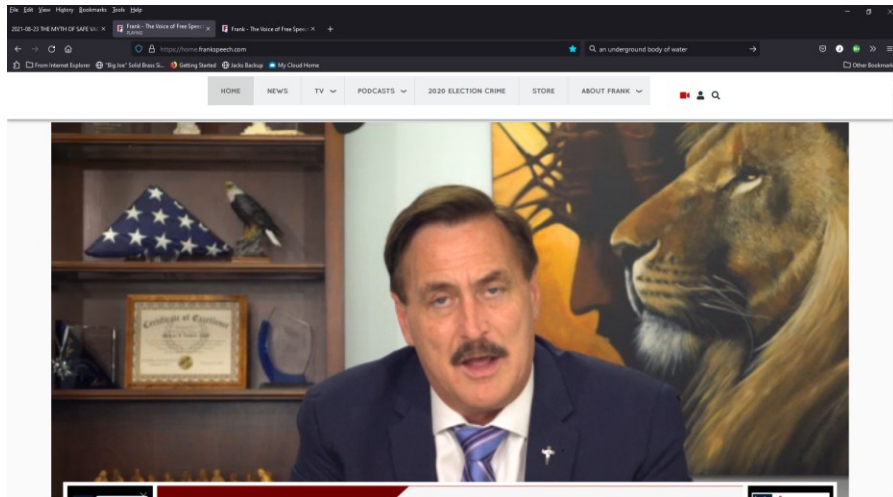

- ▶ Risk Limiting Audits (RLA) cannot be used to audit BMD systems per RLA inventor
- ▶ The November, 2020 hand count audit was not performed according to Georgia law

**Accuracy:**

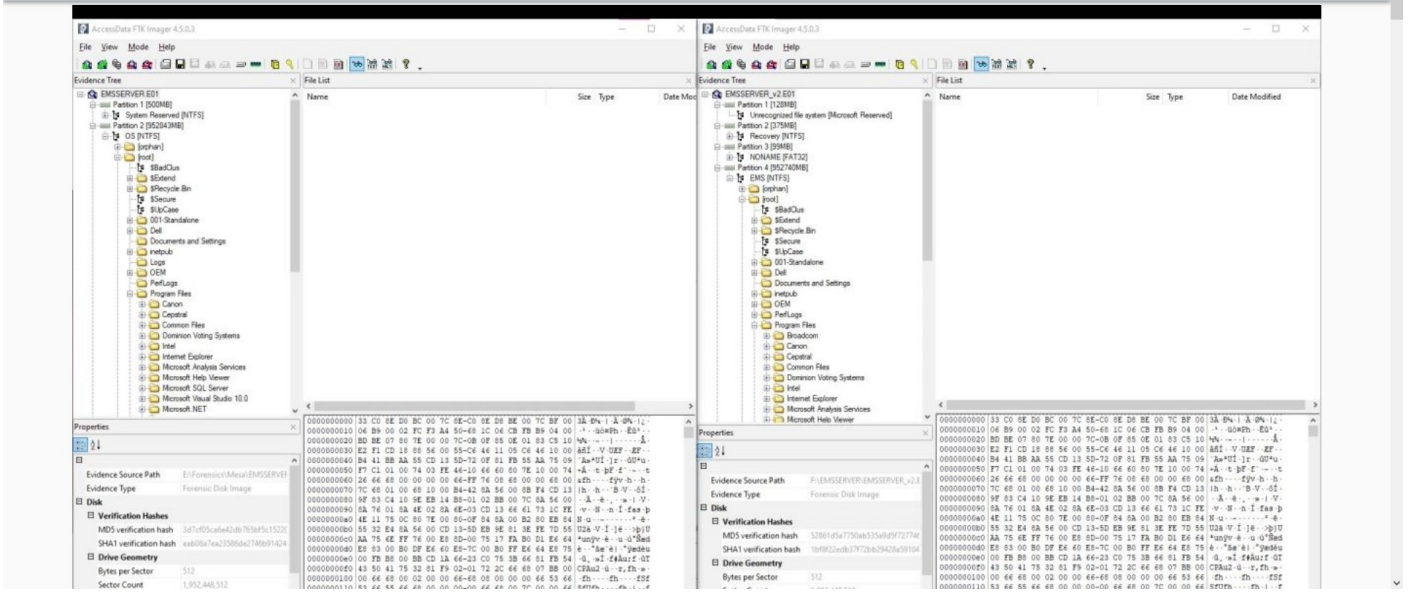

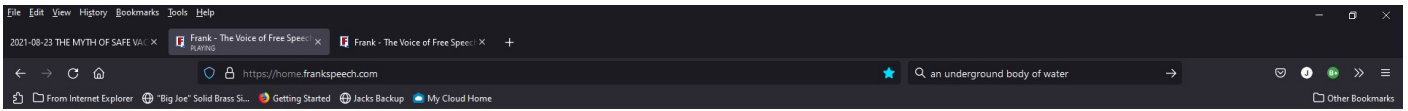

- ▶ The Dominion Democracy Suite 5.5 BMD system experienced QR code failures that appeared to disproportionately affected Republican voted in-person ballots in Georgia
- ▶ Scanner tabulators appeared to disproportionately reject Republican voted mail-in ballots

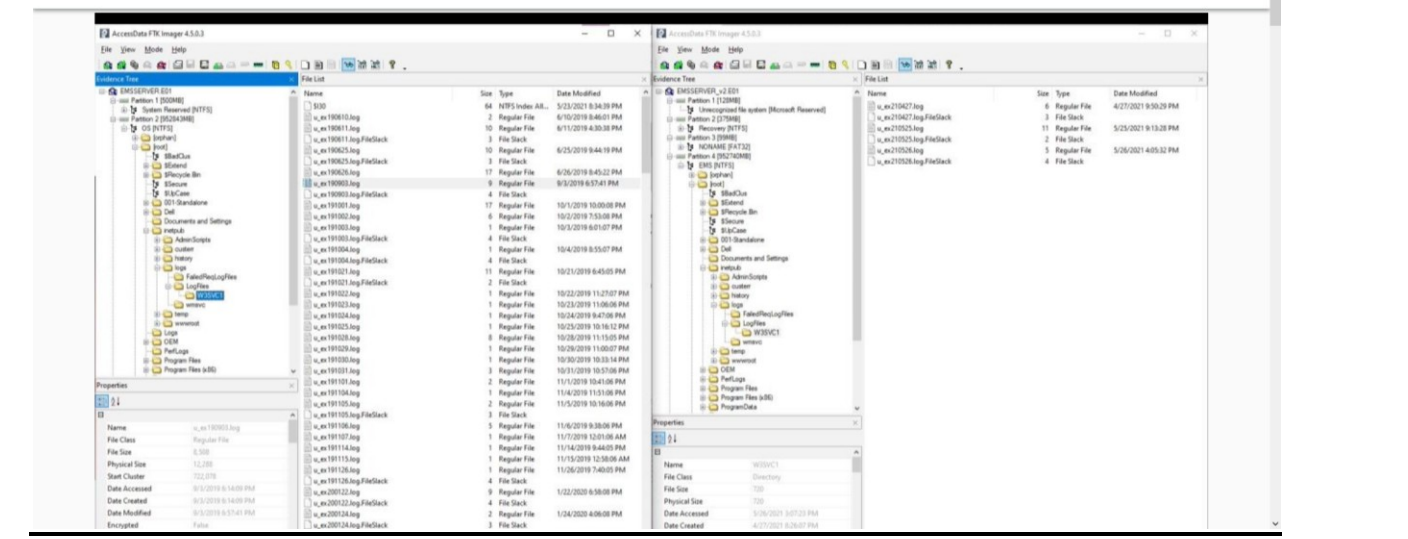

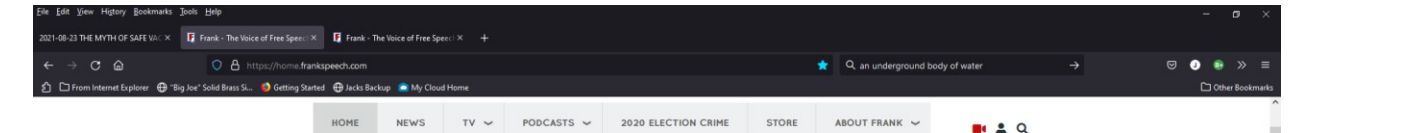

**These are the bad commissioners in Colorado that are blocking election integrity and aligning themselves with their governor.**

**This is a before and after forensic image of an election machine.**

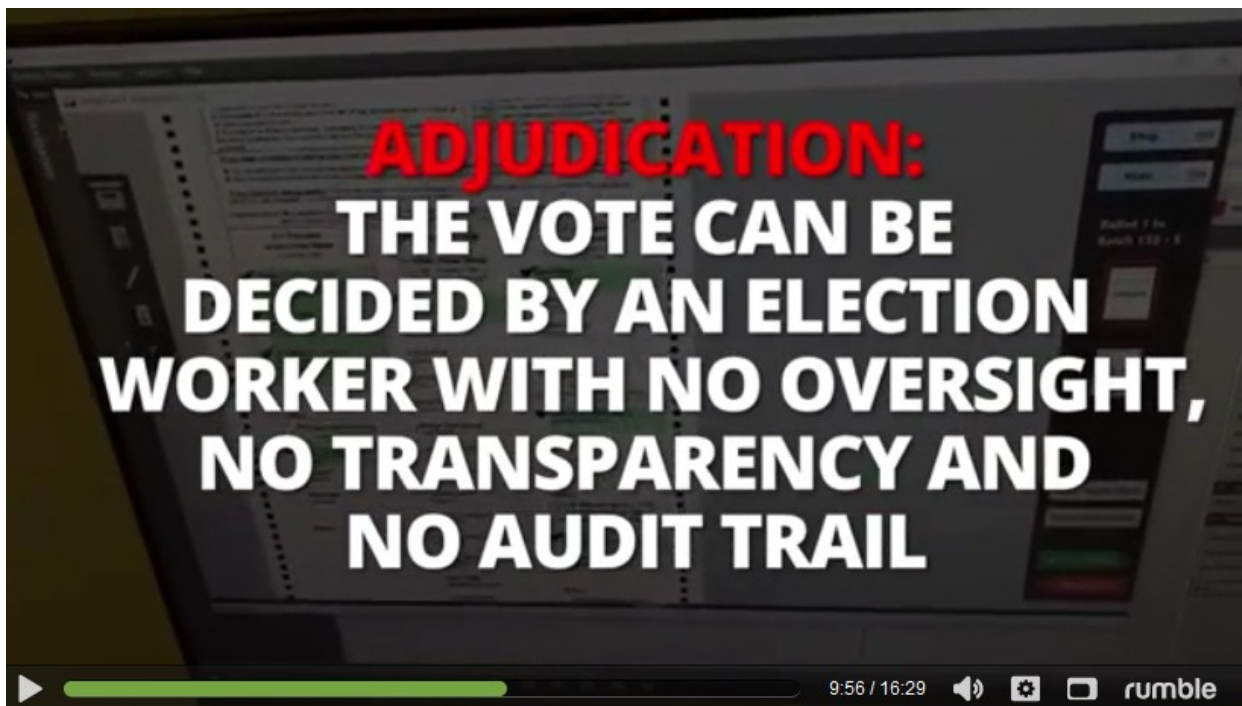

**Another capture of the files on that machine.**

---

## **Here is more voting fraud news just coming in.**

[Link here](#) to read this great letter by Kirk Mackenzie a local Patriot and Electrical Engineer sent to the Flathead County Commissioners regarding reasons not to purchase the corrupted voting machines.

The following are clips from Lady Draza work from her Telegram comments. She has 13,077 subscribers, i.e. her words directly quoted.

One of her finds is in a 12 county study only 43% voted, while 72% either failed to vote and votes were returned by mail or undeliverable ballots... **Only 43% of this subset of the population voted in a state where the overall state turnout is advertised at over 80+% in 2020. Interesting don't ya think?** Thoughts? (I have some but am going to hold my tongue for now

### 12 County Totals for 16319 Registrants

Election Data Analyzer, [23.08.21 21:51]

[ Photo ]

Remember the case of the 300 voters at 2 residences I shared above, well it just got worse. County Clerks, you may want to pay attention because the canvassing Calvary is heading in here. I also checked the property tax records and plat maps so I know these homes exist and have not been scraped and replaced with a large apartment complex. I also verified it with another expert in the field who reviewed the voter history. This is a big steaming pile of BS FRAUD. 461 registered voters between 5 of these bldgs and the empty lot. 65 have the same PO Box mailing address. 441 Unaffiliated. 90% registered after 1/1/2020. 215 Returned Ballots and 111 Undeliverable. These are phantom voters parked for the 2022 general election. Disgusting. How can a GUY with a spreadsheet find this BS and the government can't? Give me a break. Do your job!

Election Data Analyzer, [27.08.21 06:23]

[ Photo ]

Folks, I have been busy continuing my compilation of data for the 12 county study I have described above. To quickly recap, I took the top 20 unique address per county in terms of the number of registrants at that unique address from EDA, then I inspected them on a map using the EDA output file, then I categorized them by type, then brought all of that data together into a master pivot data table. There are going to be many many interesting tables and charts to come. Here is the first one. Only 43% of this subset of the population voted in a state where the overall state turnout is advertised at over 80+% in 2020. Interesting don't ya think? Thoughts? (I have some but am going to hold my tongue for now.)

This tells a story without my words. Adjustments were going on to let Trump win but minimize the lead that Trump would have at the end of the race. But then...FL Happens! Recalculate the set point, restart the algorithm, Edison zero cancels out the history to allow the new gain settings to be applied and ZOOM! Right into the new set point as a Biden state.

Got this directly from Senate President Karen Fann:

The draft report should be finished this coming week. Then the AZ Senate's specialized legal team will comb through it. This team includes the auditor, Senate president, Senate Judiciary chair, attorneys, and key Senate staff. They will verify the draft for accuracy, proof of documentation, and clarity. The AZ Senate will only issue a report that can be proven and is void of possible misinterpretation. Once these specialized Senate experts fully examine this report, the auditors will then prepare the final report, which will be presented to AZ Senate Judiciary Committee and the public.

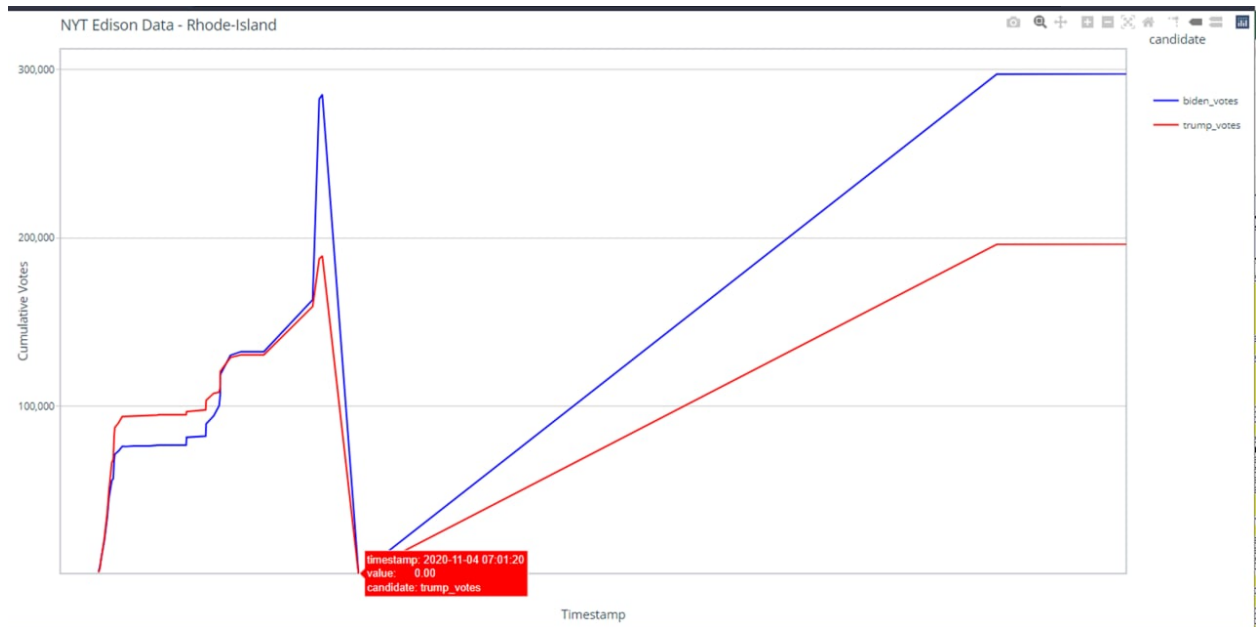

Wendy Rogers

For those saying the Arizona Audit Results are taking too long, I can tell you they are coming faster than 49 other states.

[Link here to Sign up to receive these Telegram messaging](#)

- Pick the device you want to receive Telegram messaging on.
- Pick the people/groups you want to watch/message with.

- We see the expected reductions following the call of the state. At least 5000 were able to be pulled back out. I would love to know where the coordination with the voter registration database was happening to accomplish this.
- The Ballot of [Pallets Full of Ballots - Sing Along](#)
- So - in order to have maintained that Biden set point early on, there had to be a LOOOTTTT of phantom vote padding to keep everything at that Biden set point. So, when she was allowed to raise that percentage to a Trump win, not near as many of those phantom voters were needed. So - we can ditch all of them as the end...don't pay any attention...let's just pretend they were never even there...

From the Edison reported percentages, you can see the HUGE spike in the Biden votes prior to the reset, which has been indicative of receiving a new set point and higher tuning constants.

For those asking - the Edison data reports the cumulative votes and the percentage that each candidate has during the election. But - during the Nov 2020 election, these

reporting values all went through a rolling zero that then returned to relatively the same values on the next reporting cycle. It happened in series to each state and DC. I suspect that this was application of new set points and/or new control constants to drive the vote totals to the set point within the number of votes remaining in the count.

I see a lot of questions about where this is happening. I wish I knew. But - I AM seeing a manipulation of the votes rather than what would be expected in a normal count. Here are some assumptions that I have based on some of my own observations in this data set and from conversations with others: 1) I think every type of fraud that people suspected (voter database manipulation and phantom voters, digital manipulation within some code on the counting machines, stuffing ballots, external database access and manipulation,...) happened at some place. Maybe some places had all. Maybe some places only had a subset. 2) The places that are selected for the "risk-limiting" audits or hand-counts are probably selected because some places are kept pristine in order to show that for auditing purposes 3) Mail-in ballots are horribly manipulated. This is shown in the smooth control curves of the states with more mail-in ballots than in-person votes. 4) The ballot images and/or digital totals WILL NOT match the paper ballots in most of the large cities, unless the originals were destroyed and replacements provided, sometimes at the cost of many chicken lives... (I am just guessing here...but it is a good guess. I am standing behind this one based on the behavior of the Maricopa BoE). 5) We have to demand full forensic audits in each state to show how badly the current system has been manipulating our elections, laws, and children's future. That is not melodramatic, it is just true. 6) Due to the multiple ways that the cheating took place, that even with forensic audits, we will not be able to restore the "actual numbers" of the votes that were cast by each legitimate voter, because too many will have been destroyed, shredded, discarded to be able to recover the full picture. My surmises that may all completely be wrong, but this is the position I am working from at this time based on my research.

**END OF QUOTES FROM MATHEMATICIAN LADY DRAZA**

**"The Constitution is not an instrument for the government to restrain the people, it is an instrument for the people to restrain the government."**

**Patrick Henry**

## **Jack Notes:**

### **Random Thoughts on How Elections are ONLY a Commodity to be Had:**

- 1) Edison data quoted above apparently comes from [Edison Research](#). "A proven source for accurate and timely nationwide vote tabulation."
- 2) My rough summary of all this data/material from the mathematician going by her code name Lady Draza AS WELL AS the expert witnesses on the Mike Lindell ongoing election fraud series is the following comments.
- 3) All states show common patterns of the actual vote manipulation using an algorithm.
- 4) That is, it appears each state was controlled using a bank of fraudulent votes that were drawn from each state to create fake votes.
- 5) Too grasp the extent of the "pool" of fraudulent votes go back to my previous notes and look at Pages 20 - 23, et al [LINK](#)
- 6) The reason why most elected municipal officials and at least 50% of Americans have trouble believing there is a state by state pattern of manipulation of the actual vote into a fake vote is they are unable to comprehend the enormity of the corruption.
- 7) This is how the globalist have always played their game, i.e. they think beyond what a average American can imagine and take it all because few would believe it could really be done and when they wake up it is too late to reverse the taking.
- 8) And then they cover it up via their puppets of the MSM, Big Tech, Deep State agencies, NGO's, UnFederal UnReserve, IMF, World Bank, Bank of International Settlement, IMF, Bilderbergers, Trilateral Commission, Council of Foreign Relations, United Nations, et al.
- 9) I have researched corruption of our American fundamental and founding charters for the last 17 years and when the next level of corruption occurs it never fails to stop my breath and send waves of spine tingling chills down my entire body.

- 10) The fake votes were reported not the real votes.
- 11) Adjustments can be clearly seen in each state correcting the incoming votes to a predetermined set line they wanted the ratio to level off at.
- 12) As state actual votes came in and went against the predetermined vote ratio set for that state adjustments were made to the set point, resetting the data via Edison Zero, e.g. zeroing out the data and starting over, applying new constants in the algorithm to drive the state vote to the set point percentage of Trump/Biden they wanted.
- 13) Even the mathematician Lady Draza appearing on the Mike Lindell symposium says she wonders how this all was coordinated as in who did it and from where?
- 14) The deed was set up before the 2020 election to coordinate and pull off such a massive taking requires transnational resources.
- 15) The Trump 2016 election was a massive upset for the Deep State and their transnational/globalist puppet masters.
- 16) Trump was under full court press before he got into office, e.g. SpyGate via Hillary Clinton, FBI, Fusion GPS, Perkins Coie, UK Intel, British Intel HAKLUYT, Congress, State Dept., DOJ, Media and ORBIS.
- 17) [Public Interest Legal Foundation](#) is developing a new Integrity DB that contains the voter rolls and voter list maintenance records of nearly every state in the country. This DB allows them to ID individuals on voter rolls who are registered in multiple states, registered multiple times in the same state and even registrants who are deceased. Plus they can discover whether those duplicate and deceased registrants cast ballots. This gives them massive evidence to initiate lawsuits to force states to clean up their voter rolls and stop voter fraud.
- 18) Those who say that tabulators create fewer errors than hand counting do not understand the difference between random hand counting errors and intentional programmed "errors".
- 19) It helps to think like a globalist to see through and understand the games played and how it plays into the way they move to organize themselves and the free world, e.g. One World Government, One World Order, UN, Central banking.

- 20) That is to say there is a long history of increasing undercurrent of manipulation of and by, debt, wars, monopolies, Big Tech, Media, Academia, entertainment industry, our currency/coin, our elections, free speech, the right to keep and bear arms, to protest, to assemble and even to attend the church of our faith.
- 21) Thus we were taken off hard coin and gold based standard in 1933 and off convertibility in currency in into 1971.
- 22) The lie about "man caused" global warming was another globalist psy op to grab for more control of industries, land, power, et al versus the truth that the weather on earth is primarily controlled by solar cycles.
- 23) Federal level Common Core "education" was another globalist effort to push mind control and propaganda on the children right under the nose of the parents.
- 24) Are you starting to see a pattern? Can you connect the dots? Do you think all these takings are not planned and are only random?
- 25) The more your research the history of takings in America or any country you will see a detectible signature or modus operandi.
- 26) Whether it is manipulating election votes or lying about natural weather changes caused by solar cycles, or subverting stable power sources like hydro, coal, oil, natural gas, atomic energy, etc, or destroying or lumber supply market by sweeping vast timberlands into parks, wilderness, conservation easements, etc., shutting down access to our natural minerals and precious metals, targeting the cattle industry over phony CO2, or fraudulently tax taking of our labor, wages, pensions and private property, or debasing our currency and much much more all are done by the same national and transnational globalists cartels.
- 27) If this is hard for you to believe or visualize here is a 45 pages of research I did in December 2020 to help - [Globalism is the Disease - The Deep State Rats are the Carriers Who Morph Their Shape Eating Out America.](#)
- 28) The SARS-COV-2 VIRUS was a very intentional man made bio weapon collaborated by both the US and China that may have accidently been released however, never-the-less, it was clearly man made by the same globalist cabal.

29) Globalism may be compared to a fog rolling in over the planet smothering out all common sense and decency of right and wrong changing lies to truths to increase their power, profit and control. Forget CO2! CO2 = CARBON AFFIXIATION ON ALL BY LIES X 2 FOR ALL GULLIBLES.

30) In July of 2011, I did a data analysis of the tax taking on corporations vs. individuals. Here is the summary of my findings. Link here to see the study on pages 34 - 36, [Brotherhood of Darkness](#) . *Read it - believe it - stop it.*

**Summary of IX. View 3 and 4 Graphs**

- Currently Individuals pay 12 - 14% of their Wages for 85 to 91% of Federal Taxes
- Currently 1 % of Corporate Revenue Pay ONLY 9 - 15% of Federal Taxes
- Individual Federal taxes can be replaced by a 12 - 14% tax on Corporate Revenue
- Currently .17% of Corporate Revenue Pays State Taxes
- Currently 5.18% of Individual Payroll (Wages) Pays State Taxes
- Individual State taxes can be replaced by a 1.04% on Corporate Revenue
- All taxes are ultimately paid by the consumer when they purchase by free choice

- **So Individuals are paying 12% to 14% of their wages for 85% to 91% of Federal Tax Taking while Corporations pay only 1% of their Revenue for ONLY 9% to 15% of Federal Tax Taking.**

31) The Swiss Federal Institute of Technology in Zurich did a famous study called the Bow Tie study discovering **147 firms out of some 37 million companies in the world are the dominant core who own 40% of the network wealth.** Expanding the core to 737 firms find they own 80% of the network. Link here my study and go to page 5, [Globalism is the Disease](#).

32) The national/Transnational corporations export all our resources and labor out of America for THEIR profit and power while they import goods, resources, services and foreign illegal's' back in for THEIR profit and power. This is the game Trans nationalism and globalism play on our lives, traditions, unalienable rights a.

33) This global model of taking whatever is necessary from free nations and people to make a tyrannical model work including stealing elections which is only a commodity to them to be bought and sold is how you want to make sense of this escalating nightmare.

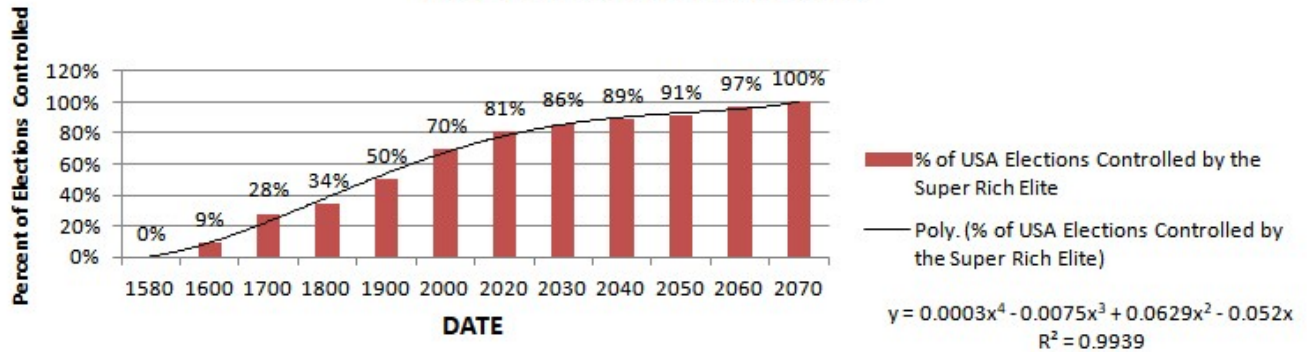

- 34) Look beyond the problem at hand and see what everybody does not see.  
Never focus on the problem and see what everyone else chooses not to see out  
of fear, conformity and laziness.**
- 35) The founding and fundamental pillars of any country are brought down over time by this massive unrestrained subversive under current like a rip tide. I am all for profit and free markets but not for unrestrained tidal waves.
- 36) Administrations and elections come and go however; corporations constantly expand their empires, sharking out anything in their way.
- 37) National, Trans national and world banking cartels print the necessary electrons to fuel this machine. This massive debt generating system can buy out any country in the world. All first, second and third world nations are bought out, enslaved and beholden.
- 38) Lies are now the truth.
- 39) Votes reported are not the actual votes by live registered natural born sovereign state Citizens.
- 40) Think of an invisible injection of highly addictive drugs injected into every critical system in America and the world to make it highly codependent on the drug pusher.
- 41) I have document all this over the last 17 years.
- 42) The depth and breadth of these takings stagger an open mind.
- 43) Not only are the elections of each state predetermined with set points for the outcome, all other resources of all countries in the world especially where there is wealth of interest to the globalists are targeted for taking.
- 44) This level of global control is done by only a few people and that number is the square root of 1% of the population of that country. Another number that comes up in history is 2/3 of 1% of the population.
- 45) If you cannot wrap your mind around formulas try to conceive there are  
ONLY 12 FAMILIES ON EARTH THAT CONTROL IT ALL!**

- 46) Whether it is the Church of England or the Vatican in Rome or the European Monarchies or the advent of the Industrial age and the transnational corporations and the nation corporate states, set points are not a conspiracy, set points of control are common tools used in the trade.
- 47) I have all the proof. The problem is only half of Americans can comprehend such truth and the other half will defy and deny it all.
- 48) That is to say most Americans have a hard time believing that the "impossible" can happen.
- 49) We have been so thoroughly conned by those we "elect", those who "teach" us, those who we trust and those who we bank on, et al that we become so codependent we cannot imagine anything outside of what we are told.
- 50) And this is exactly what the cyber experts are showing via the use of election algorithms and the transnational corporate state predetermining set point curves minimizing Trump leads and accentuating Biden votes.
- 51) IF YOU CANNOT BELIEVE THE TRUTH YOU WILL NOT SEE IT.
- 52) President Carter (1977 - 1981) stated he was surprised he could not pick out all of his cabinet members.
- 53) George Washington warned colonial Americans against entangling alliances. Ike Eisenhower warned of the immense military industrial complex that bears little relation to that known by predecessors before his time. **"We have been compelled to create a permanent armaments industry of vast proportions." "In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military industrial complex. The potential for the disastrous rise of misplaced power exists and will persist."** [Read this short speech here to understand what has happen that is no conspiracy.](#)
- 54) Guess who is picking out the cabinet members, the presidents, the insiders calling the shots how to handle the elections, the number of votes you see, the machines to use, the transnational corporations to buy them from, the banks to use to fund all this debauchery, embezzlement, fraud, complicity, larceny misfeasance, malfeasance, deception, grand larceny, sabotage, treason, equivocation, predatory targeting, entrapping, adhesion contracting racketeering, assault and battery, premeditated murder, fabrications, legal fiction, defacto laws, plutocracy, legislation by hysteria, rural cleansing, man caused global warming, tax taking of direct wages, pensions and private property, false flag culture and race wars, obstruction of justice, entrainment, exploitation, police state measures, bankruptcy, encroachment, on and on they go. The globalist elite!

- 55) The Dark Side lives & breathes by creating a world of lies to envelope the world in darkness for the ignorant to become enslaved by refusing to see the truth.
- 56) The average American should only have to work 20 years MAX and be able to retire as opposed to both the husband and wife having to work all their life and then take in their own grown children who can't/won't find jobs. Removing all direct tax taking on wages, labor, pensions, private property, usury interest, inflation, securing the borders tight would turn the current nightmare around and into a true and honest American dream vs. a corporate state nightmare.
- 57) The reason we are living in a globalist created nightmare and not in a true and honest American dream is they have fixed the election systems just like all the other systems they fixed via transnational corporations freely doing the dirty work.
- 58) Election machines are connected to the worldwide web both via wireless hot spots AND by cell towers so these machines are connected to network control centers all over the world whether you can see it or believe it as soon as they are plugged in and turned on. Not unlike your cell phone when it uses the nearest hot spot or cell tower. You often do not know the difference or care to check as it just happens.
- 59) How can you find the truth (needle in the haystack) when over 50% of the population has a log jam of lies we live in, taught with and hammered?
- 60) The Deep State are no fools which is why they TALE us in giant leaps for the vast majority cannot comprehend the enormity of the taking and conspiracy.
- 61) Free markets left to the globalists and Trans nationalist are sharked out quickly by profiteers and I am all for profit but not for being taken. International trade agreements are like elections in that they are a predetermined taking to a set point. That is to say to a level of taking that is not too obvious but just enough to take everyone of us to the cleaners for the rest of our lives and our children and grandchildren, ad infinitum so no one knows the difference until it is too late and/or we are too dumbed down to know we have been taken.
- 62) Check this prophecy out below of our future if the ballot box keeps being kicked down the road.

**% of USA Elections Controlled by the Super Rich Elite**  
**If nothing is done to stop them**  
[www.freedomfroallseasons.org](http://www.freedomfroallseasons.org)

American voter turnout is always reported as percentage of the population of 21 years and older. In Canada, Great Britain, and in Western Europe turnout figures are reported as percent of registered voters. This is why their numbers are always much larger than ours in the States.

Cybersecurity specialists identified an error rate of 68.05%, which is far above the Federal Election Commission guidelines of 0.0008%. The results of these errors led to tabulation errors and ballots being sent to adjudication, which means that the vote is decided by the election worker using the machine ([see here](#)). For example, in Central Lake Township, there were 1,222 out of 1,491 ballots cast that were reversed, producing an 81.96% rejection rate.

Although vote adjudication logs for prior years were available, all the logs for the 2020 cycle were missing. Moreover, all server security logs prior to 11:03PM on November 4th are missing. These logs are vital for audit trails, forensics, and detecting malicious intruders.

The Election Event Designer Log shows that Dominion ImageCast Precinct Cards were programmed with new ballot programming on October 23rd and again on November 5th. That violates the Help America Vote Act, which includes a 90-day Safe Harbor Period that prohibits changes to election systems, registries, hardware/software updates without undergoing re-certification.

Even if skeptics and critics win that there are limitations of the aforementioned audit, they

63) Here is the Merriam-Webster definition of Conspiracy.

## conspiracy noun

Save Word

con·spir·a·cy | \ kən-'spir-ə-sē \

plural **conspiracies**

### Definition of **conspiracy**

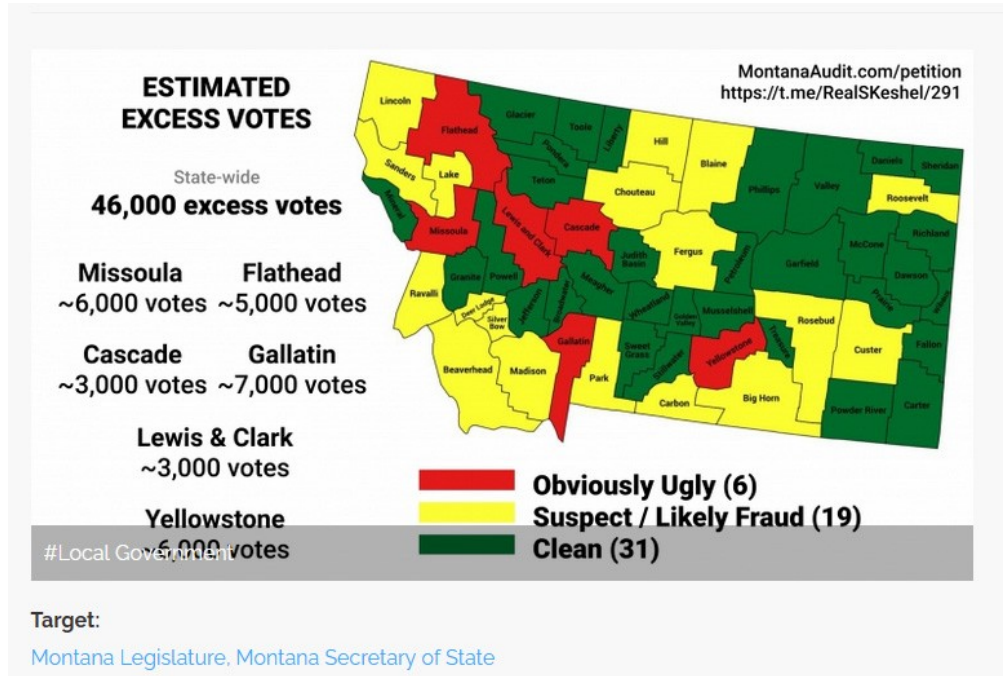

- 1 : the act of [conspiring](#) together  
// They were accused of *conspiracy* to commit murder.
- 2 **a** : an agreement among conspirators  
// uncovered a *conspiracy* against the government
- b** : a group of conspirators  
// a *conspiracy* made up of disgruntled aristocrats

64) Conspiracy can be very real, just ask Jesus Christ.

- America has been under attack since day one, Jamestown, Virginia in 1607, Plymouth Rock, Massachusetts in 1620.
- All the states show the Edison Zero, the resets, the aberrations in the running election data, the difference, slight or large, between the actual votes and the reported votes, unending examples of dirty county voting data, lack of standards,

intentional obstruction for demands of transparency. If just one bad vote is found in each county that is proof enough!

Calling a Special Session requires 76 (50% +1) of the legislators to agree while only 6 went to the Mike Lindell Cyber Symposium to see the evidence for themselves. There are 56 counties in Montana and election departments and 100 District Representatives and 50 District Senators. So to this problem of calling for a Special Session is compounded by the fact there are more districts than counties, i.e. 150 vs. 56.

- In the last 2020 election Montana, Republicans were swept into every statewide position.
- I have to ask this question. Why would any true and honest state or political party claim they have won an election looking at this estimated excess vote map of every county in Montana above. If there were only one county that was "Obviously Ugly" that should stop the results of a state wide election. This is what happens when it becomes more important to win under any circumstances versus being honorable.
- **In the map above we have 6 Montana counties "Obviously Ugly", 19 "Suspect/Likely Fraud and 31 "Clean". That is 44.6% that are fraudulent, i.e. nearly 50%! Yet we are not sure there will be 76 of the 150 some Montana House Representatives and Senate will stand up, saddle up and ride into battle.**

- Looking at the USA, we know all 3,141 municipal counties in America have been rolling over their dirty voting since day one in one degree or another. Even ignoring one bad vote is fraud.
- When is some true and honest Montana Cowboy in office going to stand up and say let us put the last election on hold until we sort out the truth of what is really going on in our state. Let Montana set the example for the nation!
- Montana needs to call for switching of election department staffs from the "Clean" counties to all the "Obviously Ugly" and "Suspect/Likely Fraud" counties and vice-versa just for starters.
- Montana Senator Manzella makes her point that the hard reality is the GOP would have call a Special Session which could potentially question their "winning" votes.
- Now we have tit for tat and the GOP have the opportunity to walk their talk and stand up and say we want to set an example to the world and America that we have the balls to question our own "winning" votes.
- The shoe is on the other foot now and this is where the real true and honest Montanan's stand up, saddle up and swing their boot into the stirrup and ride into the heat of the battle.
- If there is only one corrupted vote in each of the 56 Montana Counties that should rightfully justify a Special Session let alone all the chicanery proven by Mike Lindell and his long line of expert witnesses.
- Are 76% of 144 Montana District Representatives and Senators capable of removing the log of biased blindness from their eye to see the truth?
- One last point, the longer full forensic audits are stalled the more time the Deep Election Globalist Transnational corporate state has to wipe all their Dominion & ES&S machines clean of the 2020 data images!
- All counties want to capture their machine images NOW before any updates and upgrades and switch out of equipment.

**QED - Q.E.D. or QED is an initialism of the Latin phrase quod erat demonstrandum, meaning "thus it has been demonstrated". Literally it states what was to be shown.**

**Snow sled races in the Big Hole, era 1950's. I got my junk radios to tear apart from Ed Glassey the guy that made most if not all of these welded rod frame cockpits on skies with an airplane engine on the aft. I would take my Red Rider Wagon to Glassey's garage in Wisdom and BS with him in exchange for what he would give me to learn or tear apart at home.**

## ELECTION FRAUD IN AMERICA - A NATIONAL DISGRACE

### Abstract

Americans keep hearing that there is no need to protect against vote fraud, that fraud is either non-existent or extremely rare. We hear that regulations, such as photo voter IDs, are unnecessary and will disenfranchise voters. Yet, the United States is not unique in having this debate. Virtually all of Europe and almost all developed countries require in-person voters to use photo IDs to vote. Indeed, out of Europe's 47-countries, only the United Kingdom hasn't required photo IDs to vote in their entire country, but that is about to change. Similar in-person rules exist for most developed countries. The vast majority of countries ban absentee ballots for people living in their country. While some point out that eight of Europe's 47-countries allow for proxy voting, where you can designate someone to vote on your behalf, the safe-guards used to prevent fraud are generally far more stringent than used for absentee ballots in the US. Other countries have discovered widespread voter fraud when safeguards are not used. They also understand that relying on conviction counts is unlikely to catch the vast majority of fraud that occurs. The question is: why is the US so unique in terms of not guarding against vote fraud?

# ID Required?

---

## Yes

1. Alcohol
2. Cigarettes
3. Opening a bank account
4. Apply for food stamps
5. Welfare
6. Medicaid/Social Security
7. Unemployment
8. Rent/buy a house,
9. Drive/buy/rent a car
10. Get on an airplane
11. Get married
12. Purchase a gun
13. Adopt a pet
14. Rent a hotel room
15. Apply for a hunting license
16. Apply for a fishing license
17. Buy a cell phone
18. Visit a casino
19. Pick up a prescription
20. Hold a rally or protest
21. Blood donations
22. Buy an "M" rated video game
23. Purchase nail polish at CVS
24. Purchase certain cold medicines
25. Enter State and Federal Buildings

## No

1. Voting
