

THE MYTH OF SAFE VACCINATION - History of vaccines cause of epidemics

1712 - France -First recorded vaccination for small pox
1763 - France - Epidemic of smallpox wipes out large part of the population
Immediately attributed to inoculation, vaccination prohibited by government
for 5 years
1768- France- Medical profession successful in re-instituting smallpox
vaccination
1721- Boston, Cotton Mather attempts to introduce a crude form of smallpox
vaccination by smearing smallpox pus into scratches in 220 healthy people.
Within 6 months, only six of these people had no small pox reaction. Mather
was publicly ostracized
1723 Dublin, Ireland, First record of small pox immunization: of 25 people ,
3 died Custom was briefly abandoned
1724 Germany First recorded vaccination for small pox Disfavored after
number of deaths Years later doctor were able to reintroduce it
1754 - Rome Inoculation for small pox introduced and stopped due to deaths
Later medical professionals would successfully reintroduce it
1778- Italy - infants are inoculated by Neapolitan nurses without the
knowledge of the parents
1800- Massachusetts- Vaccination introduced at Benjamin Waterhouse at
Harvard University
1809 - Massachusetts encourages vaccination of all inhabitants with cow pox
vaccines
1810 - 535 cases of small pox after vaccination
97 fatal cases of smallpox after vaccination
150 cases of serious injury from vaccination, ten were medical men
The London Medical Observer(Vol VI, 1810) reported
1831 Germany Smallpox epidemic in Wurtemberg, 995 vaccinated people succumb
to the disease
1831 France Marseilles, 2000 vaccinated people are stricken with smallpox
1853 - England - Compulsory Vaccination Act enacted into law.
1853 - 1860 England vaccinated 75% of live births and more than 90% of
population
1853- England; Smallpox epidemic
1857- England; Vaccination now enforced by fines. Smallpox epidemic begins
lasts until 1859 Over 14,000 die
1863- England- Second major epidemic of smallpox lasts until 1865
20,000 die
1870- England ; Third major smallpox epidemic begins lasting until 1872
Over 44,800 die
1871 -England, Birmingham; from 1871 to 1874 there were 7,706 cases of
smallpox of which 6,796 were vaccinated
1867 Nonpayment of fines for skipping smallpox vaccination result in harsh
penalties

1871 Worldwide epidemic of smallpox begins 8 million people die worldwide
1871 Germany, Bavaria, vaccination is compulsory and re-vaccination is commonplace 30,472 cases of smallpox, 29,429 were vaccinated
1871 - England; Privy Council convened to inquire into the Vaccination Act of 1867 Conclusion 97.5% of the people who died from smallpox were vaccinated for it
1872 England - 87% of infants are vaccinated for smallpox
Over 19,000 die in England and Wales
1888- Russia- Bacteriological Institute in Odessa tries its hands on a vaccine for anthrax 4500 sheep are vaccinated, 3700 die from the vaccination
1896 Italy- Carlo Rota, professor at University of Perugia states that: Vaccination is a world-wide delusion and an unscientific practice, with consequences measured today with tears and sorrow without end

Cancer was practically unknown until cowpox vaccination began to be introduced. I have had to do with 200 cases of cancer and I never saw a case of cancer in an unvaccinated person.

-Dr. Charles E. Page, Boston practitioner

"Abolish vaccination and you will cut the cancer rates in half"

Dr. F. P. Millard, Toronto practitioner

"I am convinced the increase in cancer is due to vaccines"

Dr. F. Laurie, Medical Director of the Metropolitan Cancer Hospital, London

Jonas Salk, inventor of the IPV, testified before a Senate subcommittee that nearly all polio outbreaks since 1961 were caused by the oral polio vaccine. "Crib death" was so infrequent in the pre-vaccination era that it was not even mentioned in the statistics, but it started to climb in the 1950s with the spread of mass vaccination against diseases of childhood. --Harris L. Coulter, PhD.
